SUMMARY

I am a Ph.D. student with a research focus on software engineering and software security. My research work primarily involves mining software repository data and security analysis of open source projects to characterize the security best practices.

EDUCATION

North Carolina State University (NCSU), Raleigh, NC <i>Ph.D. in Computer Science - Specialization in Software Engineering</i>	Aug 2017 - May 2023 (Expected) GPA 3.63/4.00
Bangladesh University of Engineering and Technology (BUET), Dhaka, Bangladesh <i>B.Sc. in Computer Science and Engineering</i>	May 2012 - Feb 2017 GPA 3.64/4.00

EXPERIENCE

Graduate Research Assistant <i>DLF, RealSearch Lab</i>	August 2017 - Present NCSU
Software Engineering Intern <i>Diem Core - Dev Infra team</i> Developed a Rust dependency analysis tool, depdive.	May 2021 - Aug 2021 Facebook
Research Intern <i>One Engineering Systems</i>	May 2019 - Aug 2019 Microsoft Research

TECHNICAL SKILLS

- **Languages:** Python, Rust, Java, SQL, R, C/C++, Unix Shell, Latex, HTML, Vue.js.
- **Tools:** Git, Jupyter Notebooks, Pandas, NumPy, SciPy, Matplotlib, Scikit-learn, Selenium, MySQL, Azure Kusto.
- **Research Methods:** Qualitative & Quantitative analysis, Interviews & Survey, Statistical models.
- **Data Science:** Exploratory data analysis, Feature selection, Principal component analysis, Supervised models.

SELECTED PUBLICATIONS

A comparative study of vulnerability reporting by software composition analysis tools <i>Nasif Imtiaz, Seaver Thorne, Laurie Williams</i> 15th ACM/IEEE International Symposium on Empirical Software Engineering and Measurement (<i>acceptance rate: 19.4%</i>)	Oct 2021 Bari, Italy
Investigating the Effects of Gender Bias on GitHub <i>Nasif Imtiaz, Justin Middleton, Joymallya Chakrabarty, Neil Robson, Gina Bai, Emerson Murphy-Hill</i> 41st ACM/IEEE International Conference on Software Engineering (<i>acceptance rate: 21%</i>)	May 2019 Montreal, Quebec

PROJECTS

Supply Chain Security <i>Research Project, RealSearch Lab</i> - Studied popular software composition analysis (SCA) tools to identify current gaps; GitHub project. - Performed an empirical study on security release practices of open source packages; paper under review.	Aug 2019 - Present NCSU
Developer Adoption of Security Tools <i>Research Project, RealSearch Lab</i> - Analyzed the fix rate and fix complexity for Coverity alerts from historical data; GitHub project - Published two conference papers; Collaborated with Microsoft and RunSafe Security	Aug 2018 - Aug 2020 NCSU
Gender Bias in Open Source <i>Research Project, Developer Liberation Front (DLF)</i> - Large-scale analysis of GitHub data. - Mentored two <i>Research Experience for Undergraduate</i> (REU) students. - Published one workshop and one conference paper	Aug 2017 - Aug 2018 NCSU

RELEVANT COURSES — GRADUATE LEVEL

Software Engineering, Software Testing, Compiler Construction, Artificial Intelligence, Foundations of Data Science, Automated Learning and Data Analysis, User Experience.

AWARDS

- Best poster at HotSoS'19 and HotSoS'21
- RSA Security Scholar'20
- NCSU CoE Fellowship for 2017-18
- Winner at HUAWEI Seeds for the Future'16 from Bangladesh
